

I support XM Radio's plan to offer local weather and traffic information on my XM Satellite Radio. This is important information for my convenience and safety. I pay for this service, and should have the right to receive what I pay for. If local stations want to participate in this service, they can offer it free, or start a digital subscription service of their own. They should not use the government to protect themselves from competition. They should respond with innovative products of their own. Thank you for your attention to this issue.
